

Creating a world where we never uses trees to make paper and packaging

- 100% forest free, made with agricultural fibre
- Looks, feels and performs just like traditional wood fibre papers
- BLI Laboratory 99.9% Jam free certified

- Every two boxes of Sugar Sheet Paper saves 1 tree
- Every two boxes of Sugar Sheet Paper reduces 68 kg of Co2 emissions

Trucost LCA 2017&2018

Sugar Sheet Copy Paper

Supporting the environmental stewardship of many of Canada's leading organizations

Creating a world where we never use trees to make paper

Traditional wood fibre paper

- Did you know that everyday in North America 3 million trees are cut down to make paper and packaging. That's approx. 1.1 billion trees per year for paper." and packaging. *National Geographic 2019*
- "Trees are vital to absorb carbon dioxide and other gases, replenish the atmosphere with oxygen and are a vital part of a surrounding eco-system supporting wildlife and plant bio-diversity."
International Tree Foundation -2019
- An acre of trees which is approx. 400 trees produces only 800 boxes of paper
- In comparison, "an acre of trees in comparison produces enough oxygen for 18 people each day. AND absorbs enough Co2 over a year to equal the amount produced driving a car 26,000 miles".
Quiet Nature Org.2019

Sugar Sheet Paper

- Sugar Sheet Paper is 100% tree-free and manufactured using 100% agricultural fibre
- Sugar Sheet Paper looks feels and performs at the same quality standards as wood fibre paper and packaging
- Sugar Sheet Paper is fully recyclable & compostable and helps to advance a circular economy
- Sugar Sheet Paper measurably reduces greenhouse gas emissions and minimize deforestation

Creating a world where we never use trees to make paper

Sugar Sheet Paper supports the growing customer demand for sustainable solutions

- Sugar Sheet Paper provides the value of sustainability without sacrificing paper & packaging quality, performance or paying a premium
